

Samuel Gomes

Ph.D. in Computer Science and Engineering

+351 912 190 467 | 26 y/o | Lisbon | samuel.gomes@tecnico.ulisboa.pt | researchgate/Samuel_Gomes7

During my student years, I received a Bachelor's and later a Master's degrees in Computer Science and Engineering from Técnico Lisboa, focusing on the fields of Artificial Intelligence and Games. Currently, as a researcher at INESC-ID and Ph.D. student at Técnico Lisboa, I continue to study artificial intelligence areas such as adaptation, computer-driven human-human interactions, serious games technologies, and affective computing, along with transversal areas such as education science and psychology, always striving to improve both my hard and soft skills.

Education

Bachelor and Masters in CS and Engineering – Técnico Lisboa

(Sept. of 2012 - July of 2015)

Throughout the courses, I developed not only technical skills, but also other practical know-hows, such as time management and soft-skills targeted at group-based development. Most importantly, I developed self-determination, i.e. I related with multiple peers, learned how to study autonomously, and improved my competencies. In particular, I worked as a coach in the coaching teams of the Portfolio courses. I was awarded Merit Diplomas associated to the Bachelor and Master Degrees, and an Excellence Diploma associated to the Master Degree, both issued by Técnico Lisboa.

Ph.D. in CS and Engineering – Técnico Lisboa

(Since 2018)

Since the start of my doctoral program, I improved my research and data treatment skills, and acquired knowledge not only in computer science, but also in transversal fields such as education and psychology. I also had the opportunity to practice and improve my technical skills, and use tools, frameworks, and programming languages I had never used before.

Work Experience

Teaching Assistant – Técnico Lisboa

(Since 2019)

I worked as a TA in (i) Logic for Programming at 2019/2020, 2020/2021, and 2021/2022, and (ii) Three-Dimensional Visualization and Animation at 2020/2021 and 2021/2022. With these jobs, I developed teaching and coaching skills, and improved my technical know-how in

the areas connected to logic programming and computer graphics (the protégé effect). I was awarded a Teaching Excellence Diploma associated to the year 2019/2020, issued by Técnico Lisboa.

Researcher and Developer – INESC-ID

(Since 2017)

My roles as a research assistant and developer in the European Union's Horizon 2020 LAW-TRAIN project (October of 2017 - April of 2018), in the AMIGOS project (May of 2018 - December of 2019), and in the GIMME, my Ph.D. project that remains active since January of 2020 (granted by FCT), leveraged me to develop my research skills, and complemented my doctoral studies with know-hows in robotics, affective computing, psychology, and education.

Research Review Roles

(Since 2019)

I worked as a sub-reviewer for ICGI2019, VJ2019, CoG 2020 regular papers, AIIDE-20 regular papers, and CoG 2022 regular papers; and as a reviewer for CoG 2020 short papers. With these jobs, I developed critical skills, and improved my own research skills and knowledge in the process (the protégé effect).

Extracurricular Activities

Supervisor and Instructor – AfterSchool and HAC

In the HAC project by TreeTree2 from September of 2019 to June of 2020, I supervised and mentored a middle school student, helping him to conceptualize and develop a computer science project of his liking. In this scope, the student developed a snake-style game using the pygame Python library. I also worked as an instructor in the AfterSchool project by TreeTree2, in the area of Computer Science (Informática I), from March of 2021 to April of 2021, where I taught the basics of programming to middle school students, using Python. Similar to the TA jobs, these roles helped me improve my coaching skills, but more importantly, they taught me how to adapt to younger students.

Developer and Graphical/ Audio Designer – Coding Competitions

I participated in multiple coding competitions, ranging from a hackaton to game jams. In specific, I participated in Gulbenkian Hack for Good 2017, in the Google Hash-Code competitions of 2018, 2019, and 2021, and in the Global Game Jams of 2018, 2019, 2020, and 2021. These events helped me to develop my coding and game development skills, and also my soft skills and peer relatedness. I made new friends along the way, as I worked in Global Game Jams with people I didn't know before.

Member – PHD Student Club

As a member of the social division of the PHD student club, I help in the organization of social gathering events. This role leveraged skills oriented to people interaction and relatedness.

Musician – Samuel Gomes Music

I have a music channel (Samuel Gomes Music) where I publish my own songs, acting as a composer, musician and song writer.

Technical Skills

Programming Languages

Python

C#

C++

HTML/ CSS/ JavaScript

Java

Prolog

R

Libraries and Frameworks

django

d3.js, node.js, express.js

CUDA, AWS API

Tools

Unity 3D

Git (GitKraken, SourceTree)

Pentaho Data Integration

SPSS

Mongo db, SQLite, MySQL

Sublime 3, Atom, JETBRAINS (IntelliJ IDEA, Rider), Visual Studio

Blender 3D, Inkscape, Krita

Audacity

Operational Systems

Linux, Windows
