

Samuel Gomes

Ph.D. Candidate – Computer Science and Engineering

+351 912 190 467 | 26 y/o | Lisbon | samuel.gomes@tecnico.ulisboa.pt | [researchgate/Samuel_Gomes7](https://researchgate.net/profile/Samuel_Gomes7)

During my student years, I received a B.Sc. and later a M.Sc. degrees in Computer Science (CS) and Engineering from Técnico Lisboa, focusing on the fields of Artificial Intelligence and Games. Currently, as a researcher at INESC-ID and Ph.D. candidate at Técnico Lisboa, I continue to study CS areas such as adaptation, computer-driven human-human interactions, serious games technologies, and affective computing, along with other fields such as education science and psychology, while always striving to improve both my hard and soft skills.

Education

Ph.D. in CS and Engineering – Técnico Lisboa (2018 – Now)

Currently, as a Ph.D. candidate at Técnico Lisboa, I study areas such as adaptation, computer-driven human-human interactions, serious games technologies, and affective computing. My Ph.D. thesis, supervised by professors [Carlos Martinho](#) and [João Dias](#), focuses on the management of work groups based on individuals' preference for certain styles of interaction, such as competition or collaboration. This work already originated multiple publications in international conferences. Since the start of my doctoral studies, I improved my research and data treatment skills, and acquired knowledge not only in CS, but also in other fields such as education and psychology. I also had the opportunity to practice and improve my technical skills, and use tools, frameworks, and programming languages which I never used before.

B.Sc. and M.Sc. in CS and Engineering – Técnico Lisboa (September of 2012 – July of 2015)

Throughout these degrees, I developed not only technical skills, but also other practical know-hows, such as time management skills and soft skills targeted at group-based development. Most importantly, from an academic perspective, I developed self-determination, given that I related with multiple peers, learned how to study autonomously, and improved my competencies. I was awarded Merit Diplomas associated to the B.Sc. and M.Sc. degrees, and an Excellence Diploma associated to the M.Sc. degree, both issued by Técnico Lisboa. My M.Sc. thesis, supervised by professors [João Dias](#) and [Carlos Martinho](#), focused on the creation and testing of a GPU-enhanced variant of the Rapidly-exploring Random Tree planning algorithm. This work originated a publication in an Artificial Intelligence conference.

Experience

Teaching Assistant – Técnico Lisboa (2019 – Now)

I worked as a Teaching Assistant (TA) in two CS and Engineering courses: (i) Logic for Programming (B.Sc.) during the academic years [2019/2020](#), [2020/2021](#), and [2021/2022](#); and (ii) Three-Dimensional Visualization and Animation (M.Sc.) during the academic years [2020/2021](#) and [2021/2022](#). With these roles, I developed teaching and coaching skills, while also improving my technical know-how in the areas connected to logic programming and computer graphics (protégé effect). I was awarded a Teaching Excellence Diploma associated to the year 2019/2020, issued by Técnico Lisboa.

Early Stage Researcher and Developer – INESC-ID (2017 – Now)

I worked as a research assistant and developer in several projects: (i) the European Union's Horizon 2020 [LAW-TRAIN](#) project, with Ref. 2020-FCT-2014/ 653587 (October of 2017 – April of 2018); (ii) the [AMIGOS](#) project (May of 2018 – December of 2019) with Ref. PTDC/EEISII/7174/2014; and (iii) my Ph.D. project GIMME, that remains active since January of 2020 with Ref. SFRH/BD/143460/2019 (granted by Fundação para a Ciência e a Tecnologia). These roles leveraged me to develop my research skills, and complemented my doctoral studies with know-hows in robotics, affective computing, psychology, and education.

Developer and Graphical/ Audio Designer – Coding Competitions (2017 – Now)

I participated in multiple coding competitions, ranging from a hackaton to game jams. In specific, I participated in: (i) [Gulbenkian Hack for Good 2017](#); (ii) Google Hash-

Code during the years [2018](#), [2019](#), and [2021](#); and (iii) Global Game Jam during the years [2018](#), [2019](#), [2020](#), and [2021](#). These events helped me to develop my coding and game development skills, and also my soft skills and peer relatedness. I made new friends along the way, as I worked in several Global Game Jam editions with people I didn't know before.

Research Publications

Conference

Samuel Gomes, Tomás Alves, João Dias, and Carlos Martinho, "Reward-Mediated Individual and Altruistic Behavior", 2022, In: Videogame Sciences and Arts. VJ 2020

Tomás Alves, **Samuel Gomes**, João Dias, and Carlos Martinho, "The Influence of Reward on the Social Valence of Interactions", 2020, In: IEEE Conference on Games (CoG) 2020

Demo

Samuel Gomes, Tomás Alves, João Dias, and Carlos Martinho, "Message Across: A word matching game for reward-based in-game behavior change", 2022, In: Videogame Sciences and Arts. VJ 2020

Filipa Correia, Samuel Mascarenhas, **Samuel Gomes**, Silvia Tulli, Fernando P. Santos, Fernando C. Santos, Rui Prada, Francisco S. Melo, and Ana Paiva, "For The Record - A Public Goods Game For Exploring Human-Robot Collaboration", 2019, In: Proceedings of the 18th International Conference on Autonomous Agents and MultiAgent Systems

Thesis

Samuel Gomes, João Dias, and Carlos Martinho, "Application and Design of GPU Parallel RRT for Racing Car Simulation. Case Study of Iterative Parallel Sampling RRT applied to The Open Racing Car Simulator", M.Sc. Thesis, 2017, Instituto Superior Técnico

Supervision

I helped in the supervision of the [M.Sc. thesis](#) entitled "Personality-Based Reward Sharing In Cooperative Games" by [Francisco José da Silva Rosa](#), as well as the on-going M.Sc. thesis entitled "Team Formation in Gamified Environments" by [Pedro Alexandre Gonçalves Vilela](#).

Awards

I was awarded (i) a Ph.D. grant with Ref. SFRH/BD/143460/2019, issued by Fundação para a Ciência e a Tecnologia; (ii) a Teaching Excellence Diploma associated to the year 2019/2020, issued by Técnico Lisboa; (iii) an Excellence Diploma associated to the M.Sc. degree issued by Técnico Lisboa; and (iv) Merit Diplomas associated to the B.Sc. and M.Sc. degrees, both issued by Técnico Lisboa.

Professional Service

Member – PhD Student Club

(2022 – Now)

As a member of the social networking work group of the PhD Student Club, I help in the organization of social gathering events. This role leverages me to improve my peer interaction skills and relatedness, and helps me to expand my professional network.

Supervisor and Instructor – AfterSchool and HAC

(2019 – Now)

In the [AfterSchool project](#) by [TreeTree2](#) (March of 2021 – April of 2021), I worked as an instructor, teaching the basics of programming to middle school students. In the [HAC project](#) by [TreeTree2](#) (September of 2019 – June of 2020), I supervised and mentored a middle school student, helping him to conceptualize and develop a computer science project of his liking. In this scope, the student developed a snake-style game. Similar to the TA work, these roles helped me improve my coaching skills, but more importantly, they taught me how to adapt to younger students.

Reviewer

(2019 – Now)

I worked as a sub-reviewer for the following conferences: ICGI2019, VJ2019, CoG 2020 (regular papers), AIIDE-20 (regular papers), and CoG 2022 (regular papers); and as a reviewer for CoG 2020 (short papers). With these roles, I developed critical skills, and improved my own research skills and knowledge in the process (protégé effect).

Technical Skills

Programming Languages

Python

C#

C++

Prolog

HTML/ CSS/ JavaScript

R

Java

Libraries and Frameworks

django

d3.js, node.js, express.js

CUDA, AWS API

Tools

Unity 3D

Git (GitKraken, SourceTree)

Pentaho Data Integration

SPSS

Mongo db, SQLite, MySQL

Sublime, Atom, JETBRAINS (IntelliJ IDEA, Rider), Visual Studio

Blender 3D, Inkscape, Krita

Audacity

Operational Systems

Linux, Windows

Idioms

Portuguese – Birth Language
